About us

Since year 2004, our Group has been actively operating with a global vision in mind - to expand our business beyond the domestic Malaysian market. Our efforts paid off with us becoming a source of wood-alternative product supplier to a number foreign countries such as Singapore, Indonesia, Philippines, Vietnam, France, Italy, Germany, Netherlands, India, Australia and New Zealand to name a few.

The awareness for Environmental Protection has been a push factor for the driven need for Greener products in recent years, and it is expected to grow even further in times to come. This has been a thing that we care about, and had always wanted to be a part of, and it is no other that this particular reason, we make Easy Wood's product environmentally friendly and **Green Label certified** composed of more than 50% recycled contents.

But going green isn't all for us. We had taken a few steps further to make our products a better alternative to natural wood; with benefits and features **like termite resistance, water resistance, easy maintenance, and a pre-finished surface** that carries aesthetics the same way a natural wood does - less the need for painting or varnishing, as well as resistances to fungal, algae or mould growth Easy Wood products will be your perfect material of choice for all your indoor or outdoor applications needs.

Easy Wood covers a wide range of composite products ranging from T&G ceiling strips to wall cladding, deck boards, deck tiles, battens, edging boards, skirtings, cornice, architrave, furniture lining and etc. And to top it off, we have OEM Services available on request too!

We've been operating for more than 10 years... Through our years of continual development, **Easy Wood now has the widest range of composite decking and ceilings products** to meet all our customer's requirement, we offer more than just choices but a series of customizable solutions!

tested / certified
